COMMENTS

Starts even right on top of the plate - toe taps into the plate. Hips leak.
- Chokes up esp w/ 2K. Upper cut swing. Aggressive swings with count leverage. Pull oriented with occ power - looks to go the other way late.
- Show some patience - will take a walk.

FB

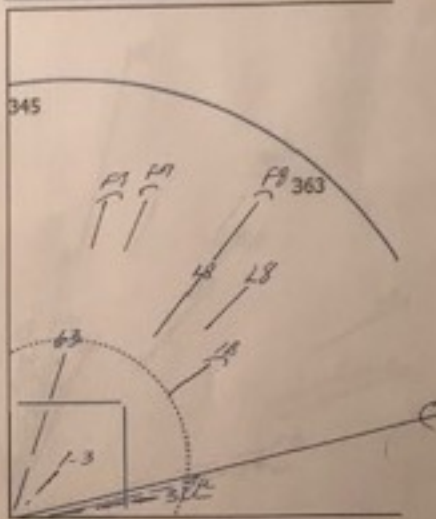

Likes the ball belt down on the inner half with his upper cut swing
- Pound him in w/ the FB - wants nothing to do with the 4 seam in at the belt. Teams have given a heavy dose of FB in as he hangs over the plate - candidate for the comeback late. Sinks down/away early work as he is looking to swing - can get to roll over - trouble covering above the belt with his swing plane.
- Can trash him away w/ his pull approach esp w/ the CH - been staying on breaking balls better this year esp the SL. Want to backdoor the CB but SL in the zone plays to his path - been doing damage vs w/ 2K - comeback FB - FB up! CH below

LHP

Looking first FB he sees - leaks vs LHP - can get in swing mode - pull oriented early - does curve the ball away late - play LF in
- Work away w/ the FB as he is trying to pull esp early - get roll overs on the outer half - trouble covering FB up. Swings over 2 seamers in off the plate - not a K w/ his leak
- Pulls off breaking balls esp w/ 2K - limit in the zone
- CH work vs his FB approach - not in the K zone
w/ 2K - Chases FB up and breaking balls off the plate

Situations

1st Swing	Yes
FP Swing	Yes esp vs LHP
